

# CompuCom Enterprise Solutions: Windows 7 Application Compatibility Strategy Review

Almost every client attempting a migration will find that some percentage of their applications will simply not be able to be installed on a Windows 7 device. CompuCom has extensive experience in providing services and solutions to overcome this common challenge. We can provide valuable knowledge and experience, and share Microsoft, industry, and CompuCom best practices that have been built in developing practical methodologies and solutions for clients around the world.

## Service Summary

Expert CompuCom consultants work with you to review tools, techniques, and best practices needed to develop an effective strategy and plan, to ensure application compatibility as part of a comprehensive Windows 7 Migration plan.

For details on this and our other services, contact your Account Executive, visit us on-line at [CompuCom.com](http://CompuCom.com) or call +1 800.225.1475

## Engagement Activities

This GetStarted service is designed to help you achieve your Windows 7 migration goals by developing a solid strategy and plan for overcoming application compatibility issues based on a foundational understanding of the recommended techniques and approaches.

During the five-days of onsite sessions, we will describe and review the techniques that are most appropriate for your enterprise environment. Typically this will incorporate a number of best practices that can be used to reduce workloads across your staff. Additionally, we will provide a high-level introduction to Application Packaging and its benefits.

The engagement will be led by an expert CompuCom consultant specializing in application virtualization, infrastructure optimization and application remediation and will consist of technical white boarding sessions, and hands-on demonstrations of the products discussed. Areas of focus and activities include:

Activity	Description
Engagement Kickoff	<ul style="list-style-type: none"> <li>▶ Introduce the CompuCom and client team, roles, and responsibilities</li> <li>▶ Describe the project goals and deliverables, and validate expectations</li> </ul>
Architectural Review	Detailed interactive discussions and whiteboarding sessions around Remediation Techniques and Process Methods
Best Practice Discussions	Interactive discussions and best practices for Application Virtualization with Microsoft App-V and Desktop Virtualization with Microsoft Med-V products
Technical Drill-Down	Hands-on technical interactive demonstrations of the setup and usage of the Microsoft App-V and Microsoft Med-V products
Strategy Discussion	Discussions and planning around Shimming, and deciding when to use shimming as a compatibility Mitigation method
Packaging methods and best practices	Interactive discussion around different packaging approaches, pros and cons and what we see in the customer community
Project Wrap-up	Final presentation to provide engagement results and recommendations to project stakeholders
