

# CompuCom Enterprise Solutions: Windows 7 Management Strategy Review

Many enterprise organizations rely on Microsoft System Center as the foundation for operating system delivery, application delivery (both physical and virtual), and patch management as part of their infrastructure optimization strategy.

This GetStarted service helps you reach your infrastructure optimization goals by developing a strategy and plan for managing the migration to Windows7 in a cost efficient, low risk manner. Just as importantly, the strategy lays the foundation for an efficient way to cost effectively provide an ongoing management environment for the desktop after the migration is complete.

## Service Summary

Expert CompuCom consultants work with you to develop a low risk plan for managing and automating a Windows 7 migration. The results improve manageability and reduce ongoing support costs.

For details on this and our other services, contact your Account Executive, visit us on-line at [CompuCom.com](http://CompuCom.com) or call +1 800.225.1475

## GetStarted Workshop

CompuCom's Windows 7 Management Strategy Review helps you explore the tools and high-level processes needed for an efficient migration, combined with a review of strategies for ongoing management of the Windows 7 environment.

During the five-day onsite sessions, we will describe and demonstrate in your environment the System Center Configuration Manager. We identify how it can be used to reduce workloads across your staff. Additionally, we outline how the best practices surrounding design and use of the product can aid with knowledge transfer from our experts to your staff. We provide a high-level introduction to Application Packaging for distribution within System Center Configuration Manager, and a detailed review of Microsoft's Deployment Toolkit and other products that can be used to deliver an automated Zero Touch or Light Touch deployment. Key activities include:

Activity	Description
Engagement Kickoff	<ul style="list-style-type: none"> <li>▶ Introduce the CompuCom and client team, roles, and responsibilities</li> <li>▶ Describe the project goals and deliverables, and validate expectations</li> </ul>
Architectural Review	Conduct whiteboard sessions to review the current environment, discuss related technical issues and potential solutions, and develop suggestions and recommendations for the current environment
Tool Introduction	Lead interactive discussions and technical overview of Microsoft Deployment Toolkit (MDT 2010) and System Center Configuration Manager
Best Practice Discussion	Conduct interactive discussions of Zero-Touch and Light-Touch deployment strategies
Tools Review	Perform a technical deep-dive demonstration including the setup and configuration of the Microsoft Deployment Toolkit (MDT 2010), System Center Configuration Manager (SCCM) and the User State Migration Tool (USMT)
Operational Aspects and Considerations	Review in detail and discuss physical and environmental considerations along with support requirements to keep the environment up and running efficiently and cost effectively
Project Wrap-up	Present engagement results and recommendations to project stakeholders

## Client Profile

The Windows 7 Management Strategy Review is offered for enterprises planning a migration to Windows 7. It helps you GetStarted towards reaching the benefits and efficiencies of an automated migration and the ongoing cost savings made possible by a well-managed environment.
