

Microsoft Office 365 Solutions

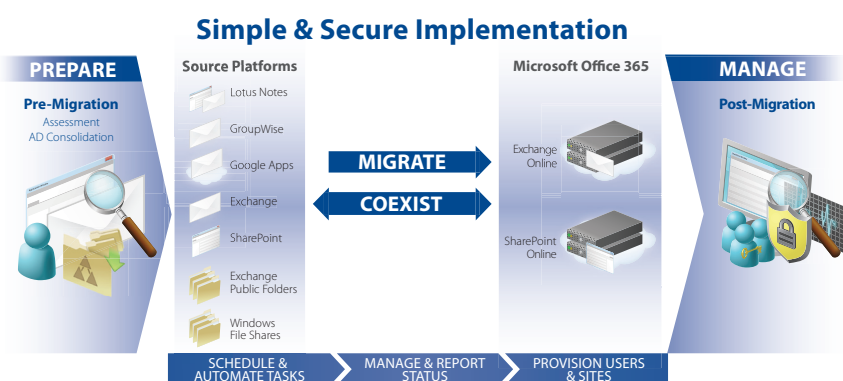

Simple and Secure Implementation of Microsoft Office 365

Many organizations are moving their email and collaborative applications to the cloud to remove the IT burden of managing them in-house. Some are implementing a hybrid environment – only migrating a portion to the cloud, while maintaining certain mailboxes and applications on-premises for security and compliance reasons. In either scenario, migrations to Microsoft Office 365 can be long, complex and expensive projects that must be carefully planned and executed. Getting the migration wrong can result in significant downtime for end users, increased IT labor costs and even data loss.

Migrate to the Cloud with Ease

Quest Software helps you migrate to Exchange Online and SharePoint Online with ease—and without loss of productivity or data—from Lotus Notes (email and applications), GroupWise, Google Apps and on-premises Exchange and SharePoint. With Quest solutions, you can perform pre-migration assessments to determine transition requirements, consolidate or restructure Active Directory to prepare for Office 365 and ensure coexistence to maintain business productivity.

During and after the move, Quest helps you centrally manage your entire environment – including legacy on-premises technologies, Office 365 or a hybrid of both – with solutions to automate administrative tasks and deployment activities, as well as provide complete visibility with reporting and auditing.

Quest solutions for Office 365 help you mitigate risk and minimize IT and end-user impact with solutions for pre-migration planning and Active Directory consolidation, migration and coexistence, and centralized management.

Solutions for Every Phase of Implementation

Prepare—Perform pre-migration assessments of Active Directory, on-premises Exchange, SharePoint and Lotus Notes environments to:

- Inventory users, mailboxes and applications, determine migration requirements, estimate project costs and plan your target platform

BENEFITS

- Assesses current environment to properly plan for migrations
- Mitigates risk to provide little or no impact on end-user productivity
- Ensures coexistence between legacy platform and Office 365 to maintain productivity
- Centralizes administration of Office 365 or hybrid implementations

QUEST SOLUTIONS FOR OFFICE 365

Pre-Migration Assessments

- MessageStats®
- Migration Assessment Tool
- Notes Migrator for SharePoint
- Reporter
- Server Administrator for SharePoint
- Site Administrator for SharePoint

Migration

- GroupWise Migrator for Exchange
- Migrator for Cloud Email
- Migrator for SharePoint Online
- Notes Migrator for Exchange
- Notes Migrator for SharePoint

Coexistence

- Coexistence Manager for GroupWise
- Coexistence Manager for Notes

Management

- Deployment Manager for SharePoint
- MessageStats

DATASHEET

- Identify users, mailboxes and applications that don't need to be moved, making your migration faster and less expensive
- Consolidate or restructure your Active Directory environment before the migration to properly prepare for Office 365

Migrate—Mitigate the risk of data loss and minimize IT and end-user impact:

- Migrate mailboxes with high fidelity from Lotus Notes, GroupWise, Google Apps and on-premises Exchange to Microsoft Exchange Online
- Migrate from Lotus Notes, on-premises SharePoint, Windows file shares and Exchange public folders to SharePoint Online with high data fidelity and fewer development resources
- Move more email and application data to the cloud with fewer migration jobs to reduce project costs and timelines
- Schedule and automate migration tasks to simplify the transition and reduce IT labor costs
- Monitor migration process with detailed status reports to satisfy management reporting requirements

Coexist—Ensure interoperability between end users on Notes or GroupWise and Office 365:

- Ensure the fidelity of email and calendar data sent between platforms, such as recurring meetings, to maintain end user productivity
- Synchronize directories and provide free/busy lookups between Notes or GroupWise and Office 365 to ensure proper calendar scheduling

Manage—Stay in control of your messaging and collaboration environment, including hybrid implementations of Office 365 and on-premises technologies:

- Simplify audits and better understand your messaging environment by reporting on your Office 365 users, their activated services and password expiration dates, tracking of all consumed licenses and discovering inactive user accounts that can be removed
- Automate and control the deployment of changes between your SharePoint Online environment to ensure reliability and reduce IT burden

About Quest Software, Inc.

Quest Software (Nasdaq: QSFT) simplifies and reduces the cost of managing IT for more than 100,000 customers worldwide. Our innovative solutions make solving the toughest IT management problems easier, enabling customers to save time and money across physical, virtual and cloud environments. For more information about Quest solutions for administration and automation, data protection, development and optimization, identity and access management, migration and consolidation, and performance monitoring, go to www.quest.com.
